"Default Browser" for Supplier Integration and ESP Online Integration

The Supplier integrations in Order Entry and the ESP Online integrations both require Microsoft's IE to be the default browser.

If IE isn't your default browser you will receive the following:

ESP Online issue

Profitmaker website launcher

Tool check Failed. The ProfitMaker Com Test Failed.

At this time you must use Internet explorer version 6.0 and above as your default browser for supplier integration.

ESP Online you need to be running version 8.0
