Have You Streamlined E-ASI Billing to it's Fullest?

Are you currently doing your Call Now in Vouching?

There is a way that you can do the E-ASI Billing in one step instead of 2 separate steps. A setting in Company Information allows you to run the Call Now process when you click on the E-ASI billing button in vouching. You will have your invoices as of that very moment ready to be vouched.

Go into Company Information, General Button, Edit on the bottom and then click the ASITransact/EDI Settings button. Edit again here and there is a field for "Path for E-ASI billing import program". This information can be found in the properties of the ASI/EDI Icon. Right click on the icon and go into properties. Once this information is entered, your E-ASI billing process will now be done in one step!
