How can an SH line item help me?

"SH", indicates you want to bill shipping charges as a line item. This allows you to reflect shipping charges in the gross profit of the order and optionally affect commission. You may choose to do this if you are charging more than your actual cost.

The price of SH line items will affect the G/L account for freight billed, instead of sales. The cost will not affect the G/L at billing since the expense would usually be taken during vouching. If you don't want shipping charges reflected in the order's profit, enter the charges on the ship info screen at the time you bill the order.
