How Do You Add Multiple Logos?

Additional logos can also be referenced here. These can be assigned to a Customer Resource as the logo to be used on forms going to a specific customer.

A specific logo can be assigned to a customer within the Other Expander on the Customer Resource. The logo must be added to the Logo expander in Company Setup, in order to be available in the Company Logo combobox on the Customer Resource.

The forms generated for a quote, order, or invoice containing this customer would show the logo assigned to the Customer Resource. This could be different for each customer.

ACKNOWLEDGEMENT
103
PO/Reference

A logo added to the Program for the Packing List will trump the Customer Resource assigned logo. If you have the expanded inventory option and use program masters, a logo can be added to a program. Orders with a program attached print the program logo on forms, if there is one.
