How Do You set up a Payment Method?

Tammy Mason - 2022-07-18 - in Authorize.net

How Do You set up a Payment Method?

At least one Payment Method resource must be set up and designated with the Authorize.net service provider. All credit card types can be processed under the same payment method or multiple payment methods can be setup for each credit card that will be processed through the Authorize.net service provider.

Type	Customer				<input checked="" type="checkbox"/> Credit Card
Description					
Account	100	Cash in Bank	Q	Edit	Provider Name (Select)
Type – Customer			Account – The bank ledger account for this payment method		
Description – The description of the payment					

How do I set up my customer?

A default “Pay With” can be setup on the customer resource with the customer’s payment method.

Company					
Terms	Net 30	Credit Limit	\$0.00	Discount	0.00%
		<input type="checkbox"/> Finance Charge		Pay With	(Select)

This is not required, but if indicated on the customer resource, this payment method will default into all orders entered for the customer.
