How Do You Update Product Additional Charges?

The option to “Update Product Additional Charges” was added so that when the Product Resource for “Setup Charge” was changed, the user now has the ability to update all of the Product Resources that use this additional charge.

The screenshot shows a software interface for managing vendors and costs. At the top, it says "Vendors/Costs (2)" with a "Manage" link. Below this is a header row with columns: Primary, Code, Name, and Vendor SKU. The main area contains a table with columns for Quantity and Purchased Cost. The first row shows a quantity of 1 and a purchased cost of \$30.0000. Below the table, there are input fields for "Per" (set to 1) and "Stock conversion factor" (set to 1.000). A button labeled "Update Product Additional Charges" is visible in the top right corner of the interface.

To update charges; if Art Unlimited changed the cost of a “Setup Charge”, not only would the resource for “Setup Charge” need to be changed, but also all the “Additional Charges” listed on other products that included a “Setup Charge” from Art Unlimited.

Open the product for the Setup Charge. Change the vendor cost on the “Setup Charge” product resource and save.

This screenshot shows a product resource interface. The top bar includes a search field with "decor" and "Decoration Vendor". A button labeled "Update Product Additional Charges" is highlighted with a red box. Below the header, there is a table with columns for Quantity and Purchased Cost. The first row shows a quantity of 1 and a purchased cost of \$20.0000. Below the table, there are input fields for "Per" (set to 1) and "Stock conversion factor" (set to 1.000).

Then go back to the vendor expander and click “Update Product Additional Charges”. The left side will show what the cost will change to and the right side will list all the Product Resources that have this listed as an “Additional Charge”. Those that are selected
