To install or verify installation of Internet Information Services on Windows 10/11

Click on Start

Type appwiz.cpl. This will open the control panel applet for Programs and Features.

Select the option for Turn Windows Features on or off

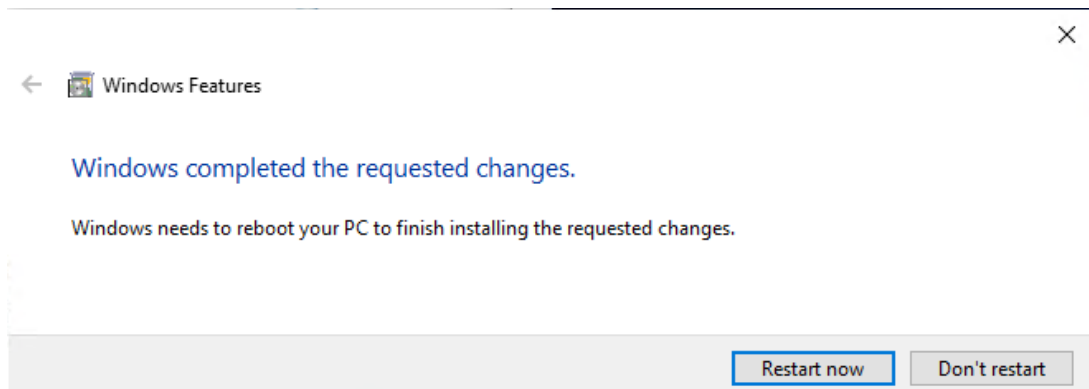

If the box next to Internet Information Services is populated, IIS is

installed, and this step can be cancelled.

If the box next to Internet Information Services is empty, IIS is not installed. Click the box and hit OK.

When the installation finishes, it will return to the control panel. This process may prompt a system restart to finalize.
