What are the Supported file types for Artwork Thumbnails?

At this time, ASI SmartBooks supports JPG, BMP, GIF and PNG file formats. ASI SmartBooks does not support EMF, EPS, IMG, PCX, TGA or TIF file formats.

The Image area for thumbnails printed on the forms is approximately 1" x 1" (the image area for the Company logo on forms is approximately 1" x 6")

The image will be shrunk or expanded to fit into the image areas with limited distortion (ex: if the image is too busy to shrink down without loss of clarity it may not print well on the form because of this shrinkage).
