### **Why is the Vendor Name Printing on the Last Line of The Check?**

Did you know that if you have a vendor masters which only has a name and no address it will print the vendor's name way at the bottom of the checks?

There is a way to correct this.

If you delete the country code from the vendor masters which have no address at all, the vendor's name will again appear at the top of the name/addr area of the check.
